Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on July 2, 2004 has been entered.

DETAILED ACTION

Response to Amendment

The Amendment, filed on July 2, 2004, has been entered and acknowledged by the Examiner.

Claims 1-14 are pending in the instant application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 14 is rejected under 35 U.S.C. 102(b) as being anticipated by Suzuki et al. (EP 0 726 591 A1).

Regarding claim 14, it is noticed that applicant is claiming the product of an image display apparatus including a method (i.e. a process) of making an electron source,

Art Unit: 2879

consequently, claim 14 is considered a "product-by-process" claim. In spite of the fact that a product-by-process claim may recite only process limitations, it is the product and not the recited process that is covered by the claim. Furthermore, patentability of a claim to a product does not rest merely on the difference in the method by which the product is made. Rather, is the product itself which must be new and not obvious (see MPEP 2113). Consequently, for the purpose of this rejection, the final product comprising the claimed structural elements and not the process limitation is being considered in the rejection set forth.

Suzuki discloses an image display apparatus (Fig. 8) comprising an electron source having a substrate (1001), a plurality of electron-emitting devices (1002) arranged in a matrix by connection to a plurality of row wirings (1003) and column wirings (1004) formed on the substrate, a fluorescent film (1008) configured to be irradiated by electrons emitted from the electron-emitting devices to emit light and a TV signal receiver (Fig. 26).

Allowable Subject Matter

Claims 1-13 are allowed over the prior art of record.
